Product Data Sheet

AMPHOBET D

INCI Name Disodium CocoAmpho Diacetate

Formula

Accordance TU 2484-008-89535834-14

Specification

Specification Limit Method of Analysis

1. Visual appearance at 25oC	yellowish liquid	visual
2. Odor	faint, characteristic	organoleptically
3. Dry residue, (mass %)	49,0 - 51,0	TU 5.2
4. Concentration of active matter, (mass %)	37,0 - 39,0	TU 5.3
5. Concentration of sodium chloride (mass %)	11,0 - 12,5	TU 5.4
6. pH (20 % aqueous solution)	7,5 - 8,5	TU 5.5
7. Gardner color value, no more than	4	TU 5.6

Application

AMPHOBET D (analog of MIRANOL C2M, Rewoteric AM 2C) is a soft amphoteric surface-active agent with very good foaming and detergency performance not affected by the hardness of water. Compatible with anionic, cationic and nonionic materials; stable over a wide range of pH (2-13). Particularly suited for use in association with alkyl ether sulfate for baby and adult non – irritating shampoos; leaves a pleasant hair feel, with good wet and dry-combing properties.

Physical Properties	See Safety Data Sheet
Health and Safety	See Safety Data Sheet
Storage	Store in dry place away from direct sunlight or source of heat, acids and oxidising agents at 5 - 40 °C
